

Course Descriptions

Accounting Basics

Accounting Basics provides a complete foundation in basic accounting procedures for you if you have minimal or no college accounting or business background, or if you need a refresher course or to prepare for further accounting study.

Audience: Students with little or no accounting background at any level.

Accounting: College (Recommended prerequisite: Accounting Basics)

Accounting teaches students the information needed to create financial statements, including trial balances, t-accounts, balance sheets, and various other accounts and their respective functions. Emphasis is placed on the conceptual framework involved in the classification and summarization of financial data. Valuation of assets and liabilities and recognition of revenue and expenses under the accrual basis are emphasized. Please note: Students should expect 6-8 hours of homework each week.

Audience: Students who require a fundamental knowledge of accounting

Accounting: Financial (Recommended prerequisite: Accounting: College)

This course covers accounting terminology; the recording and classifying of financial transactions, including analyzing, journalizing, and posting; the preparation of the trial balance, work sheet and financial statements; a familiarization with handling of adjustments, bad debts, inventory and depreciation; and matters concerning sole proprietorship and partnership. Course objectives: describe content and purposes of balance sheet and income statement; compare the basic characteristics of the accrual basis with the cash basis of accounting; explain the full accounting cycle and prepare all required journals, entries, and adjustments; outline the necessity for and features of internal control; identify the basic assumptions, principles, and modifying conventions of accounting; describe how inflation affects information presented in conventional financial statements; define partnerships and explain their characteristics.

Audience: Appropriate for students who need a working knowledge of accounting.

Analyzing Financial Statements (Prerequisite: Accounting - College or Financial)

A practical introduction to financial analysis from the viewpoint of the commercial loan officer, this course gives you the skills you need to effectively assess a borrower's ability to repay loans. After successfully completing this course, you will be able to: relate how a company's type of business, legal structure, size, and management strategies affect the way a lender conducts financial analysis; analyze income statements, balance sheets, and pro forma statements; calculate key financial ratios and use them to compare a company's performance with that of the company's industry; use advanced analytical techniques - sensitivity analysis, sustainable growth, working investment analysis, break-even analysis, and operating leverage; determine when a funds flow statement is required; construct and analyze long-run, multiple-year forecasts of income statements and balance sheets; and construct and interpret a cash budget.

Audience: Designed for commercial loan officers, credit analysts and trainees who have a basic knowledge of accounting principles and practices and a familiarity with the commercial lending process.

Business Communications

This course takes you through a well-developed, consistently applied process approach to communication that is combined with integrated, hands-on application of current and emerging business technologies. Students learn a process for solving future communication problems, and how to use Internet and electronic media to deliver their message, resulting in a tangible communication strategy they can use throughout their careers.

Business Math

This course is a comprehensive coverage of personal and business related math topics. Basic math skills are essential for survival in today's business world. Learning day-to-day application of math concepts is necessary to become successful in the financial services industry. Topics to include: understand how many ratios, payments, interest, etc. are calculated; understand how gross and net pay are calculated; understand the different types of banking accounts and how business math applies to them; calculate loan payments and interest; understand the cost of credit; calculate mortgage payments, including insurance costs; calculate life insurance premiums; estimate technology costs; and understand employee recruitment expenses, including the cost of part-time vs. full-time employees.

Commercial Lending

This course will give you the knowledge and skills to be an effective commercial lender. It covers both the technical side of lending and the important human relations skills all successful lenders must have. After successfully completing this course, you will be able to: explain why good human relations skills are critically important to the successful lending officer in many stages of the commercial lending process; identify the functions of the loan interview and credit investigation; describe how the borrower's financing needs and business type can affect the structuring of a loan; list important elements of loan documents and describe their functions; and name some warning signs of problem loans and identify ways that you can prevent problem loans

Audience: Designed for entry-level commercial lending officers, officer trainees, or personnel supporting commercial lending officers.

Consumer Lending

In this comprehensive overview of the consumer lending business, participants learn the essentials about closed-end loans, indirect loans and related credit products, and open-end credit products. They also trace the consumer lending process from developing and taking loan applications to collection and recovery. After successfully completing this course, you will be able to: describe key laws or regulations affecting consumer lending; list characteristics, benefits, and disadvantages of direct lending, indirect lending, and open-end credit products; explain how effective marketing can increase loan outstandings and application volume; describe consumer loan information sources and the credit verification process; explain how the five C's of credit are used in credit evaluation and decision making.

Audience: Designed for entry-level consumer lenders, consumer credit personnel, and bank employees who need to understand consumer credit.

Customer Service Excellence

Discover why improving your service to consumers is a career investment. Learn how to provide service that meets the needs and expectations of every consumer. Course content includes: recognize the importance of customer service; understand the communication process; recognize the value of face-to-face interactions; describe how to effectively use the telephone to communicate; identify techniques for interacting with diverse customers; identify techniques for handling challenging situations; explain the role of technology in customer service; describe the importance of effectively working with internal customers.

Audience: Anyone who has direct or indirect contact with consumers.

Deposit Accounts and Services

This course provides the tools you need to effectively open deposit accounts and help potential customers make the best account choices. It will increase your understanding of the different types of account ownership. At the conclusion of the program participants will be able to: understand deposit investment counseling; state the account owner's rights and responsibilities; examine new account precautions; compare savings, checking, money market accounts and certificates of deposit; define individual, joint, corporate, partnership and trust account ownership; understand contributions and distributions of Traditional, Roth, Education, SEP and SIMPLE IRAs; and accurately administer decedent accounts when an owner dies testate or intestate.

The content of the course includes: team building skills; group dynamics; coaching and counseling; productive performance appraisals; support of employee career development; creating a high-opportunity work environment; embracing change; and continuous improvement of employees.

Audience: Designed for new or experienced supervisors and first-line managers or those preparing for such a role.

Management

This course presents management theory and applications in an engaging narrative style not commonly found in textbooks. The author's unique organization and features focus on the critical theories and enhance them with detailed examples that draw the reader into the reading and clearly show their implications for managers and organizations. The text's unique organization focuses on how managers "make things happen" in modern organizations, exploring the role and impact of management on individuals and organizations.

Managing Performance and Productivity

This course covers the management principles needed by today's supervisors. It discusses how supervisors can use processes and systems to encourage maximum productivity of their employees. Topics to be covered: how to use an effective interview process to select the best candidate; the mentor system and techniques for training employees; establish expectations and measure productivity and performance; work simplification and time management skills; use technology to improve productivity; manage meetings and give presentations; and how to use problem-solving tools to reach results

Audience: New or experienced supervisors and first-line managers or those preparing for such a role.

Marketing

The primary objective of *Essentials of Services Marketing: Concepts, Strategies Cases*, is to provide materials that not only introduce the student to the field of services marketing, but also acquaint the student with specific customer service issues. The business world now demands, in addition to traditional business knowledge, increasing employee competence in customer satisfaction, service quality, and customer service - skills that are essential in sustaining the existing customer base.

Audience: Students who have not had a formal course in marketing and who wish to increase their understanding of all facets of marketing.

Money and Banking (Recommended prerequisite: Economics)

Money and Banking teaches the role of money, credit, and financial institutions in the U.S. economy. Topics include commercial banks, thrifts, credit unions, the Federal Reserve system, credit markets, and monetary theory and policy. It emphasizes the effects of structural change, globalization, financial innovation, and technology on the financial environment.

Audience: Students who have not had a formal course in money and banking and who wish to increase their understanding of the banking industry; officer trainees through mid-management level bankers.

New Account Fraud

This program covers the critical information needed to reduce the chances of opening an account that the 'customer' intends to use to commit fraud. Participants will learn practical techniques that help to reduce fraud at the time accounts are opened. Topics to be covered: describe types of new account fraud; follow steps to detect fraud in the new account interview process; list types of applicant identification documents and describe standards for acceptance; verifying an applicants signature; analyze suspicious applicant behavior and types of transactions; describe the decision making process for determining whether to open an account; and describe new account fraud prevention methods used in electronic account opening.

Audience: Customer service representatives, personal bankers, new account personnel, supervisors, managers and tellers.

Principles of Banking

This course explores the principles and practices of banking and credit in the United States. The course gives an excellent overview of financial services, including information on human resources, marketing, and ethics. Topics to be covered include: money and interest, negotiable instruments, mortgages, commercial lending, security and ethics, and the role of banking in today's economy.

Audience: Personnel new to banking, at any level.

Real Estate Appraisal

This course is a thorough outline of current appraisal theory and practice, providing a practical guide to real estate appraisal for students. After successfully completing this course, you will be able to: define terms associated with real estate appraisal; discuss the formal appraisal process; understand inspections and analysis; understand cost and income approaches; estimate depreciation

Audience: Anyone working in lending or interested in gaining an understanding of the appraisal process.

Real Estate Law

This course brings to life the color and law of real estate in day-to-day settings. In addition to the lively case selection, it also has a clear set of rules that will enable you to recognize, solve, and prevent legal issues.

As a result of this course, students will be able to: understand partial ownership AND co ownership of real property, and lending issues related to these topics; discuss real estate residential and commercial leases; understand mechanic's liens (strikethrough: methods of real property conveyance); discuss constitutional issues, specifically eminent domain powers; and understand environmental issues in real property, focusing on Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

Residential Mortgage Lending

This course covers construction and permanent financing for residential property; real estate law; documentation; mortgage loan servicing; the secondary mortgage market; the role of government in mortgage lending; and residential real estate as an investment. The discussion of underwriting, processing, and servicing will give participants a framework for learning the mortgage lending business and refining their existing knowledge. Additionally, the coverage of laws and regulations affecting mortgage lending provide an understanding of mortgage lending's history and a glimpse into its future.

Audience: Financial service professionals who want a broad overview of mortgage lending.

Retail Banking

This course provides a broad understanding of financial institutions. After successfully completing this course, one will be able to: describe consumer financial needs and matching products; understand retail financial institutions' charters and organization; utilize types of deposit and lending services; describe customer/member service operations and support departments in retail financial institutions; and practice regulatory and supervisory controls.

Audience: Anyone who is new to retail banking.

Sales Excellence

This course challenges financial institution employees to see themselves as sales professionals. It provides the tools needed to achieve the level of sales professionalism required by financial institutions today. Upon completion of this course, participants will be able to: overcome hesitations about selling and benefit from a professional approach to sales; recognize how your sales efforts benefit your institution, your customer and you; adjust your selling techniques to comply with the unique challenges of financial selling; identify customers' financial needs quickly and efficiently in a variety of customer situations; structure your sales presentation as a dialog with the customer, rather than 'pitching' the product; use the techniques of listening, questioning and communicating nonverbally to improve results in sales situations; customize product presentations for specific customers and their problems or needs; present products in terms of benefits as well as features in order to gain customer commitment; gauge customer interest in the product enabling you to ask for the sale at the right time; respond effectively to common objections to financial products and services; use proven strategies for efficiently confirming the sale; create a positive customer encounter, regardless of the outcome; analyze demographics to help understand customers' life-styles and their financial wants and needs; shop the competition to improve sales results; implement tele-consulting strategies to improve sales results; and use goal setting and the power of positive thinking to improve sales success.

Audience: Anyone who works at a financial institution and has customer contact including tellers, personal bankers and loan officers.

Supervision

Supervision blends skill-building techniques and traditional management principles to prepare students to become supervisors in today's business world. The course will emphasize that supervision is working through people to develop and empower them to become better and more efficient in their roles, and closely follows the SCANS requirements for the five workplace competencies and three-part foundation of skills and personal qualities needed for job performance.

Audience: Both practicing and aspiring supervisors who have little formal knowledge of supervision.

Understanding Organizational Behavior

Understanding Organizational Behavior studies the scholarly foundations upon which the science of organizational behavior is built. You will learn how to transform business challenges into personal opportunities and organizational advantages. This course builds upon a powerful theme of change to clearly demonstrate how change not only affects attitudes and behaviors within an organization, but also offers new opportunities and experiences for those who can learn how to profit from its potential. This course addresses timeless organizational behavior topics, such as motivation, leadership, teamwork and communication, as well as some of the emerging issues shaping the field of organizational behavior today. Supporting themes focus on the challenges and opportunities within globalization, diversity, and ethics today. You learn not only the concepts and theories that help enhance the management of human behavior at work, but also learn how to practice these skills. You will learn how to answer today's demands on the individual to learn, grow, and adjust as this book equips you for success within today's changing world of work.

Audience: Anyone interested in learning more about organizational behavior.
